

New Product Introduction

Passive Infrared or Pyroelectric (PIR) Motion Sensors EKMB and EKMC Series “Saturn Lens”

Panasonic PIR Motion Sensors (PaPIRs) Product Line Expands To Include The New “Saturn Lens”
Designed To Realize Two Functions in One Lens!

Panasonic, a worldwide leader in Sensors technology, is pleased to introduce the New “Saturn Lens” PIR Motion Sensors.

Named for their unique capabilities, **Saturn Lens PIR Sensors** can detect standard motion in outer areas and slight motion in center areas of a space. The Saturn Lens can be used in private spaces and can detect movement in or out of a space as well as movement in the center of an area detecting even slight motion.

Features and Benefits

- Detects Slight Motion In The Center Of A Space
- Detects Standard Motion In The Outer Area Of A Space
- Matches With Panasonic PIRs VZ and WL Type Sensors
- Same Pin Arrangement As Current Panasonic PIR Sensors For Easy Detection Function Upgrades In Existing Devices

Applications

- Lighting Equipment

Industries

- Lavatories
- Fitting Rooms
- Private Office Spaces
