

Panasonic

Extraordinary Solutions for Education

In-person. Hybrid. HyFlex. Virtual. Whatever your client's "new normal" is, Panasonic offers the education community a comprehensive portfolio of high-performance professional audio-visual solutions for all types of learning environments.

Now more than ever, EVERY faculty member should be using a dedicated microphone!

These days, with face masks, social distancing, and hybrid remote learning, it's even more important that faculty use a dedicated microphone when teaching their classes.

So just how much does a facemask impede the audibility of a teacher? We did some research and found that face masks can cause as much as 14 dB decrease in audibility even with a microphone placed line-of-sight just 9.8 feet away! [Click Here](#) to learn more.

Panasonic wireless microphones are designed specifically for the higher education environment and we can help you and your team design and deploy wireless mics in every classroom in your facility.

Don't leave money on the table – encourage your customers to upgrade all their classrooms to a wireless mic system that is optimized for the presentation, affordable, durable, and easy to use.

Q-SYS™

QSC Q-Sys Integration with Panasonic Wireless Mics Available Now!

We'd like to thank all the beta testers that provided feedback! Panasonic is pleased to announce a Q-SYS integration module is available now for control of Panasonic's digital wireless microphone system.

4K Displays Engineered for Ease of Use, Low Failure Rate and 24/7 Operation!

Our latest lineup of displays and projectors deliver upon Panasonic's reputation for providing crisp, dynamic images, durability, and ease of use.

Our CQE1W series leads the professional industry in price and performance, while our SQE series is perfect for digital signage solutions as they're rated for 24/7 operation, have a higher brightness and can be used in portrait mode as well as landscape mode.

Help your customers accelerate student learning in any setting – with Panasonic's Project Moonshot for Professional Development

Educational institutions have been challenged to provide online & hybrid instruction. Maximize the value you can add to your educational customers by offering them access to a critical resource to help all their faculty members be more effective in reaching all students, regardless of environment.

Panasonic has partnered with world renowned Cyber Learning Pioneer, Dr. Sonny Magana, to offer Dr. Magana's T3 Framework and learning platform. Magana's T3 Framework enables teachers to improve productivity, teach better, and accelerate student learning by harnessing the power of Dr. Magana's research-based, classroom proven sequence of learning strategies and tools.

Expand your revenue stream to sales of Professional Development solutions in the educational vertical. Ask your customers who at their institution is responsible for Pedagogy / Instructional Design! Contact Darryl.krall@us.panasonic.com to learn more!
